

Cboe XBT Bitcoin Futures

Cboe Futures Exchange, LLC (“CFE”) launched trading in XBTSM futures on December 10, 2017, becoming the first U.S. Bitcoin futures contract. XBT futures are U.S. dollar-denominated, cash-settled futures contracts that are based on the auction price of bitcoin on the Gemini Exchange. XBT futures are designed to reflect economic exposure related to the price of bitcoin and settle to a single, tradeable auction price.

As an Exchange-listed product, XBT futures provide the benefits of a regulated contract to gain exposure to the price of bitcoin or manage risk and hedge their underlying bitcoin holdings, with a contract that settles directly to an underlying bitcoin auction price.

Cboe XBT futures contracts provide:

- ▶ More price discovery and price transparency
- ▶ An Exchange-listed, regulated and surveilled bitcoin product
- ▶ A risk management tool for bitcoin-holding participants
- ▶ Exposure to the cryptocurrency sector without a digital wallet requirement
- ▶ Settlement directly to a tradeable bitcoin auction price, rather than an average price

Cboe Global Markets, Inc. may explore additional cryptocurrency product opportunities such as ETFs, or futures and options on other cryptocurrencies in the future.
