

**CFE Information Circular IC17-026**

**Date:** July 7, 2017  
**To:** Trading Privilege Holders and Vendors  
**From:** CFE Systems Development  
**RE:** Updates to Integration Documents

---

CBOE Futures Exchange, LLC (CFE) has published a number of documents related to the migration of the CFE trading system to the Bats technology and expects to continue to update those documents. For example, there were minor changes made recently to the CFE Platform Change Matrix, the CFE Multicast Depth of Book (PITCH) Specification, and the CFE Multicast TOP Specification.

CFE Trading Privilege Holders and vendors should regularly check the [CFE Integration Webpage](#) for any updates. Each document includes a revision history that notes when the document was last updated. CFE does not plan to issue a circular each time a document is updated on the integration webpage.

All documents related to the migration of CFE's trading system to Bats technology are available at <http://batsintegration.cboe.com/cfe>.

**Additional Information**
